DR HENRY TOI

THINK TO THRIVE

RE-ENGINEERING YOUR MIND FOR GROWTH

Thinking happens almost automatically from the day we are born. However, this can be said of speaking and listening. We all know that few people speak well and listen well. It is the same for thinking: few think well. This book *Think to Thrive* will examine the basis of thinking and introduce a fundamental model of a process of good thinking called PEARL. The simple and effective tool can be used to improve thinking in almost any situation we face. PEARL is as applicable in the classroom as in the boardroom.
